Everything is a process and making handmade soap just seemed like the natural thing to do for myself. After changing what I put IN my body because of a cancer scare, I started looking at what I was putting ON my body also. I found an alternative way to live. We can all changed our thinking to be towards a more natural way of being, one step at a time we can make strides to providing our bodies with nourishment and less chemicals.

Why not start by treating your skin to a more natural moisturizing cleansing!
